

KEY FEATURES EXERCISE  
VAC MEETING #7  
SEPTEMBER 12, 2007

Please mark with a circle, the destination points that you feel that are most important for visitors to experience while visiting the Park.

Please mark with a star, the most appropriate location for a visitor orientation area.

Please mark with a triangle, the most appropriate location for a visitor center.

Please mark with a square, the most appropriate location for park staff to work from. (Note: it may be combined with other facilities or locations if you desire)

If you mark an area that is unnamed, please briefly describe the feature you are highlighting.

Tongue River Reservoir and Kobold Homestead

Near main public area

Foot trails to these specific locations

I disagree with any future road development

The primary road will take care of 90% of the visitation. Secondary road to Kobold Res for special ??? - hard core battle students and & FWP man

Kobold for employee residence, not necessarily the original house, storage of required equipment, etc. Admin. from VC - contact point office

Interim

Visitor center only if access road available from highway. Vision statement includes facilities implies having a center in long range plans. Circle between Crook's Camp & Kobold home is a second point for orientation.

I do not feel that the visitor needs to physically visit any of these sites but I do feel they should be allowed to.

The staff should work from the best location as defined by the park manager, i.e. near the visitor center, in the Kobold home or both. Keep "D" route.

Should take Park Manager's advice on staff location
